MARISYM BIOLOGICALS

ROOTING INNOVATIONS

Welcome to Marisym Biologicals, where innovation meets sustainability to transform industries through the power of nature. At Marisym Biologicals, we are on a mission to revolutionize various sectors by offering sustainable biological solutions inspired by the intricate relationships found in nature.

OUR CORE MISSION

Our mission revolves around addressing poultry health, nutrition and productivity challenges while championing sustainability. Through eco-friendly additives and responsible production practices, we're here to help poultry farmers thrive. Our goal: reducing environmental impact and elevating profitability.

RESEARCH AND INNOVATION

Marisym Biologicals is at the forefront of industry advancements. Our team of scientists and nutritionists passionately creates breakthrough solutions to stay ahead of emerging trends. Quality control in our state-of-the-art facilities guarantees the safety and efficacy of our additives.

PIONEERING SOLUTIONS

Marisym Biologicals leads in beneficial microbes and green chemistry. Our groundbreaking spore mimic technology empowers non-spore forming bacteria to conquer temperature stress, making them ideal for feed pelletization and more. This innovation enhances gut health and poultry performance.

EXCEPTIONAL PRODUCTS

Our range includes top-tier organic trace minerals, super hydrating gel for day-old chicks and herbal extract formulations. These natural solutions promote growth, health and vitality in poultry.

IN THIS PORTFOLIO

DISCOVER HOW WE EXCEL IN FOUR KEY AREAS

DIGESTIVE HEALTH

Explore our probiotics and enzymes for superior gut health, a cornerstone of efficient nutrient absorption and feed utilization.

NUTRITIONAL SOLUTIONS

Our revolutionary additives ensure a balanced and tailored diet, optimizing growth, egg production and overall poultry health.

DISEASE MANAGEMENT

Discover natural additives that support poultry immune systems, reduce stress and minimize the need for antibiotics.

COST SAVINGS

See how our additives improve feed conversion efficiency, leading to significant cost savings for farmers.

MARISYM BIOLOGICALS

PRODUCT	INFORMATION	BENEFITS	POULTRY TYPE	DOSAGE
GALVIGO-BAC PROACT	A thermostable *Bacillus spp.* probiotics for feed mix	Improved body weight FCR, performance, and productivity - Enhanced poultry health	Broiler/Layer/Breeder	***500 g** /ton of feed
GALVIGO-BAC NS	Formulation of *Lactobacillus sp., Enterococcus sp., Pediococcus sp,.* and *Bacillus spp.* designed with Spore Mimic technology	Resilient immunity and stress resistance - Optimal gut health	Broiler/Layer/Breeder	***20 g** /1000L of drinking water
GALVIGO-BAC NSF	A multi strain consortia of probiotics for feed mix developed by Spore Mimic technology.	Improved feed utilization Enhanced egg quality	Broiler/Layer/Breeder	***500 g** /ton of feed
GALVIGO-PHYTASE	The newest generation thermostable bacterial phytase that unlocks maximum nutrients from feed raw materials	Optimized nutrient availability - Improved profitability	Broiler/Layer	***100 g** /ton of feed
GALVIGO-CHICGEL	A specialized hydrating gel for day-old chicks, addressing dehydration stress during transportation.	Hydration and energy support - Early gut protection - Development support	Chicks	***100 g** in 2.5L of water for 2500 day-old chicks
GALVIGO-DHA	Sustainable fermented formulation of omega-3 fatty acid (docosahexaenoic acid) of vegan origin	Enhances immunocompetency, Omega 3 enriched meat and eggs.	Broiler/Layer	**3 kg** / ton of feed for general health **5-10 kg** / ton of feed for egg enrichment
Integrated Housefly Management				
LARVOBLITE	Mineral formulation for killing housefly larvae in poultry facilities	Maintains farm hygiene results in healthier birds-Cost effective fly control solution-Offers long-lasting effects	Layers/Breeders	**25 kg** /shed (530 ft length *33 ft width)/application 6-8 spot application is recommended for single shed/month for effective control
FLYPULL	House fly attractant dunk composed of plant derived natural ingredients	Non-toxic, chemical-free solution to fly control-Cost effective approach-Requires minimal effort in application	Layers/Breeders	**One dunk** per trap 60 traps/shed (of approx. shed size of 530 ft length * 33 ft width)
LITTERFIX	Microbial-balanced formula for improved feed digestion and litter quality	Maintain gut homeostasis-Improved litter quality -Reduced fly menace in poultry premises	Layers/Breeders	**500g** /ton of feed

Marisym Biologicals, values your partnership and believes in shaping a better future together. As you delve into this portfolio, find valuable insights and inspiration. Whether you're a farmer, feed producer, veterinarian, or researcher, our portfolio invites you to connect with us. Let's collaboratively redefine poultry nutrition for the better. Thank you for joining us on this transformative journey; exciting opportunities for collaboration and innovation await.
